

Buchveröffentlichungen

1. Höhere Analysis:
 - a. VEB Deutscher Verl. Wissenschaften, Berlin 1972
 - b. 2. Aufl., Verl. Harry Deutsch, Frankfurt a. M., 1980
2. Fourier analysis and function spaces: Teubner, Leipzig 1977
3. Interpolation theory, function spaces, differential operators:
 - a. VEB Deutscher Verl. Wissenschaften, Berlin 1978
 - b. (Koproduktion von a) North-Holland, Amsterdam 1978
 - c. (Nachdruck von a): Beijing, 1978
 - d. Erweiterte russische Übersetzung von a: Mir Moskau 1980
 - e. 2. erweiterte Auflage von a: Barth, Heidelberg, Leipzig 1995
4. Spaces of Besov-Hardy-Sobolev type: Teubner, Leipzig 1978
5. Analysis und mathematische Physik:
 - a. Teubner, Leipzig 1982
 - b. (Koproduktion von a): Hanser Verl., München 1982
 - c. 2. erweiterte Aufl. von a: Teubner, Leipzig 1984
 - d. Englische Übersetzung von c: Teubner, Leipzig 1986
 - e. (Koproduktion von d): Reidel, Amsterdam 1986
 - f. 3. erweiterte Aufl. von c: Teubner, Leipzig 1989
 - g. (Koproduktion von f): Birkhäuser, Basel 1989
6. Theory of function spaces:
 - a. Akad. Verlagsgesellschaft Geest & Portig, Leipzig 1983
 - b. (Koproduktion von a): Birkhäuser, Boston 1983
 - c. (Nachdruck von a): Beijing, 1983
 - d. Erweiterte russische Übersetzung von a: Mir, Moskau 1986
 - e. (Reprint von a): Modern Birkhäuser Classics, Springer, Basel, 2010
7. (mit H.-J. Schmeißer) Topics in Fourier analysis and function spaces:
 - a. Akad. Verlagsgesellschaft Geest & Portig, Leipzig 1987
 - b. (Koproduktion von a): Wiley, Chichester, England, 1987
8. Higher Analysis: Ambrosius Barth, Leipzig 1992
9. Theory of function spaces II:
 - a. Birkhäuser, Basel 1992
 - b. (Reprint von a): Modern Birkhäuser Classics, Springer, Basel, 2010
10. (mit D. E. Edmunds) Function spaces, entropy numbers, differential operators:
 - a. Cambridge Univ. Press 1996
 - b. (Paperback von a): Cambridge Univ. Press 2008
11. Fractals and spectra:
 - a. Birkhäuser, Basel 1997
 - b. (Reprint von a): Modern Birkhäuser Classics, Springer, Basel, 2011

12. The structure of functions. Birkhäuser, Basel 2001
13. Theory of function spaces III. Birkhäuser, Basel 2006
14. (mit D.D. Haroske) Distributions, Sobolev spaces, elliptic equations. European Math. Soc. Publishing House, Zürich 2008
15. Function spaces and wavelets on domains. European Math. Soc. Publishing House, Zürich 2008
16. Bases in function spaces, sampling, discrepancy, numerical integration. European Math. Soc. Publishing House, Zürich 2010
17. Anmerkungen zur Mathematik. Edition am Gutenbergplatz, Leipzig, 2011
[EAGLE 052 ... www.eagle-leipzig.de/052-triebel.htm](http://www.eagle-leipzig.de/052-triebel.htm)

Publikationsliste

1. Über verallgemeinerte Lamésche Funktionen. Publ. Math. Debrecen 9 (1962), 257–263
2. Über die Lamésche Differentialgleichung. Math. Nachr. 30 (1965), 137–154
3. Differenzierbarkeitseigenschaften Greenscher Funktionen elliptischer Differentialoperatoren. Math. Z. 90 (1965), 325–338
4. Einige Einbettungssätze für Räume von Distributionen. Wiss. Zeitschr. FSU Jena, Math.–Naturw. Reihe 14 (1965), 293–299
5. Randwertprobleme quasilinear elliptischer Differentialgleichungssysteme. Math. Nachr. 31 (1966), 347–362
6. Eine Bemerkung zu den Einbettungssätzen von Sobolew. Publ. Math. Debrecen 13 (1966), 87–88
7. Zur Struktur elliptischer Differentialoperatoren mit konstanten Koeffizienten. Arch. Math. (Basel) 17 (1966), 455–458
8. Über die Verteilung der Approximationszahlen kompakter Operatoren in Sobolev–Besov–Räumen. Invent. Math. 4 (1967), 275–293
9. Existenz- und Unitätssätze für quasilineare elliptische Differentialgleichungen. Math. Ann. 169 (1967), 294–306
10. Erzeugung nuklearer lokalkonvexer Räume durch singuläre elliptische Differentialoperatoren zweiter Ordnung. Math. Ann. 174 (1967), 163–175
11. Über das Dirichletsche Problem für abzählbar unendliche quasilineare stark elliptische Differentialgleichungssysteme gerader Ordnung. Math. Nachr. 35 (1967), 7–17
12. Zur Spektraltheorie hypoelliptischer Differentialoperatoren. Publ. Math. Debrecen 14 (1967), 125–149
13. Erzeugung des nuklearen lokalkonvexen Raumes $C^\infty(\bar{\Omega})$ durch einen elliptischen Differentialoperator zweiter Ordnung. Math. Ann. 177 (1968), 247–264
14. Ein hinreichendes Kriterium für die Lösbarkeit der Dirichletschen Randwertaufgabe für quasilineare elliptische Differentialgleichungen. Studia Math. 29 (1968), 117–124
15. Eigenschaften Greenscher Funktionen nicht–selbstadjungierter elliptischer Operatoren. Studia Math. 30 (1968), 339–353
16. Eigenwertverteilungen und Greensche Funktionen entarteter elliptischer Differentialoperatoren. Czechoslovak Math. J. 18 (1968), 117–136
17. (mit A. Pietsch) Interpolationstheorie für Banachideale von beschränkten linearen Operatoren. Studia Math. 31 (1968), 95–109
18. Über die Approximationszahlen der Einbettungsoperatoren $J(B_{p,q}^r(\Omega) \rightarrow B_{p',q'}^{r'}(S))$. Arch. Math. (Basel) 19 (1968), 305–312

19. Zur Interpolation von Normidealen in Hilberträumen. *Wiss. Zeitschr. FSU Jena, Math.–Naturw. Reihe* 18 (1969), 263–267
20. Singuläre elliptische Differentialgleichungen und Interpolationssätze für Sobolev–Slobodeckij–Räume mit Gewichtsfunktionen. *Arch. Rational Mech. Anal.* 32 (1969), 113–134
21. Allgemeine Legendresche Differentialgleichungen, I. *J. Funct. Analysis* 6 (1970), 1–25
22. Interpolationseigenschaften von Entropie- und Durchmesseridealen kompakter Operatoren. *Studia Math.* 34 (1970), 89–107
23. Nukleare Funktionenräume und singuläre elliptische Differentialoperatoren. *Studia Math.* 38 (1970), 285–311
24. Singuläre elliptische Differentialgleichungen und Interpolationssätze für Besov–Räume mit Gewichtsfunktionen. In "Elliptische Differentialgleichungen, I", Schriftenreihe Inst. Math. Akad. Wiss. Berlin, Heft 7, Akademie–Verl., 1970, 159–164
25. Über die Verteilung der Approximationszahlen von Integraloperatoren in Sobolev–Besov–Räumen. *J. Math. Mech.* 19 (1970), 783–796
26. (mit U. Grünwald) Laguerresche Differentialoperatoren. *Math. Nachr.* 47 (1970), 331–343
27. Allgemeine Legendresche Differentialoperatoren. II. *Ann. Scuola Norm. Sup. Pisa* (1970), 1–35
28. Eine Bemerkung zur Interpolation von Banachräumen. *Beiträge Anal.* 2 (1971), 51–55
29. Spaces of distributions of Besov type on Euclidean n-space. Duality, interpolation. *Ark. Mat.* 11 (1973), 13–64
30. A remark on embedding theorems for Banach spaces of distributions. *Ark. Mat.* 11 (1973), 65–74
31. L_p –theory for a class of singular elliptic differential operators. *Czechoslovak Math. J.* 23 (1973), 525–541
32. Über die Existenz von Schauderbasen in Sobolev–Besov–Räumen. Isomorphiebeziehungen. *Studia Math.* 46 (1973), 83–100
33. Structure theory of function spaces. *Sem. Goulaouic–Schwartz 1973/74, Exp. III*
34. Boundary values for Sobolev - spaces with weights. Density of $D(\Omega)$ in $W_{p,\gamma_0,\dots,\gamma_r}^s(\Omega)$ and $H_{p,\gamma_0,\dots,\gamma_r}^s(\Omega)$ for $s > 0$ and $r = [s - \frac{1}{p}]^-$. *Ann. Scuola Norm. Sup. Pisa* 27 (1973), 73–96
35. Function spaces and elliptic differential operators. *Astérisque* 2 et 3 (1973), 305–324
36. Interpolation theory for spaces of Besov type. Elliptic differential operators. In "Theory of Nonlinear Operators", Proc. Summer School, Babylon (ČSSR), Academia, Prague 1973, 135–191

37. Interpolation theory for function spaces of Besov type defined in domains, I. *Math. Nachr.* 57 (1973), 51–85
38. Interpolation theory for function spaces of Besov type defined in domains, II. *Math. Nachr.* 58 (1973), 63–86
39. Interpolation properties of the ε -entropy and widths. Geometric quantities of the embedding in function spaces of Sobolev-Besov type (Russian). *Mat. Sbornik* 98 (1975), 27–41
40. Eine Bemerkung zur nicht-kommutativen Interpolation. *Math. Nachr.* 69 (1975), 57–60
41. (mit H. Kretschmer) L_p -theory for a class of singular elliptic differential operators, II. *Czechoslovak Math. J.* 26 (1976), 438–447
42. (mit H.-J. Schmeißer) Anisotropic spaces, I. (Interpolation of abstract spaces and function spaces). *Math. Nachr.* 73 (1976), 107–123
43. Spaces of Kudrjavcev type, I. (Interpolation, embedding and structure). *J. Math. Anal. Appl.* 56 (1976), 253–277
44. Spaces of Kudrjavcev type, II. (Spaces of distributions: duality, interpolation). *J. Math. Anal. Appl.* 56 (1976), 278–287
45. Remarks on multiple Fourier series. *Anal. Math.* 2 (1976), 305–312
46. Multipliers in Besov spaces and in L_p -spaces. (The cases $0 < p \leq 1$ and $p = \infty$). *Math. Nachr.* 75 (1976), 229–245
47. Spaces of distributions with weights. Multipliers in L_p -spaces with weights. *Math. Nachr.* 78 (1977), 339–355
48. General function spaces, I. (Decomposition methods). *Math. Nachr.* 79 (1977), 167–179
49. General function spaces, II. (Inequalities of Plancherel–Polya–Nicol’skij type, L_p -spaces of analytic functions, $0 < p \leq \infty$). *J. Approximation Theory* 19 (1977), 154–175
50. General function spaces, III. (Spaces $B_{p,q}^{g(x)}$ and $F_{p,q}^{g(x)}$, $1 < p < \infty$: basic properties). *Anal. Math.* 3 (1977), 221–249
51. General function spaces, IV. (Spaces $B_{p,q}^{g(x)}$ and $F_{p,q}^{g(x)}$, $1 < p < \infty$: special properties). *Anal. Math.* 3 (1977) 299–315
52. Multipliers and unconditional Schauder bases in Besov spaces. *Studia Math.* 60 (1977), 145–156
53. Remarks on Lebesgue–Besov spaces (Representations, multipliers, embedding). In "Approximation Theory for Functions", Proc. Intern. Conf. in Kaluga, "Nauka", Moscow, 1977, 375–382
54. Multiplication properties of the spaces $B_{p,q}^s$ and $F_{p,q}^s$. Quasi-Banach algebras of functions. *Ann. Mat. Pura Appl.* 113 (1977), 19–31

55. Multiplication properties of Besov spaces. *Ann. Mat. Pura Appl.* 114 (1977), 87–102
56. On spaces of $B_{\infty,q}^s$ type and C^s type. *Math. Nachr.* 85 (1978), 75–90
57. (mit A. Kufner) On a generalization of Hardy's inequality (Russian). In "Papers of S. L. Sobolev's Seminar", Novosibirsk 1978, 1, 61–68
58. On Besov–Hardy–Sobolev spaces in domains and regular elliptic boundary value problems. The case $0 < p \leq \infty$. *Comm. Partial Differential Equations* 3 (1978), 1083–1164
59. On Haar bases in Besov spaces. *Serdica* 4 (1978), 330–343
60. On the Dirichlet problem for regular elliptic differential operators of second order in the Besov spaces $B_{p,q}^s$: The case $0 < p \leq \infty$. In "Elliptische Differentialgleichungen", Rostock 1978, 237–263
61. A note on quasi-normed convolution algebras of entire analytic functions of exponential type. *J. Approximation Theory* 22 (1978), 368–373
62. (mit A. Kufner) Generalizations of Hardy's inequality. *Sem. Matematica Univ. Bari* 156 (1978), 1–21
63. (mit B. Stöckert) Decomposition methods for function spaces of $B_{p,q}^s$ and $F_{p,q}^s$ type. *Math. Nachr.* 89 (1979), 247–267
64. A multiplier in Besov spaces, which is not a multiplier in Lebesgue spaces. In "Banach Centre Publ. 4", Warsaw 1979, 287–291
65. Multipliers for Besov spaces. In "Coll. Mathem. Societatis János Bolyai 19", Budapest 1979, 861–870
66. General function spaces, V. *Math. Nachr.* 87 (1979), 129–152
67. Strongly degenerate elliptic differential operators in Besov spaces. The case $0 < p < \infty$. *Beiträge Anal.* 13 (1979), 27–47
68. Mapping properties of regular and strongly degenerate elliptic differential operators in the Besov spaces $B_{p,q}^s(\Omega)$, the case $0 < p < \infty$. In: "Proc. Equadiff IV", Lecture Notes Math. 703, Springer Verl. Berlin 1979, 424–432
69. Recent developments in the theory of function spaces and linear regular elliptic differential equations. In "Nonlinear Analysis, Function Spaces and Applications", Teubner, Leipzig 1979, 149–175
70. (mit Tran Duc Long) Equivalent norms and Schauder bases in anisotropic Besov spaces. *Proc. Royal Soc. Edinburgh Sect. A*, 84 (1979), 177–183
71. Theorems of Littlewood–Paley type for BMO and for anisotropic Hardy spaces. In "Constructive Function Theory", Sofia 1980, 525–532
72. Equivalent quasi-norms in spaces of Besov–Hardy–Sobolev and smoothness properties of functions. *Wiss. Zeitschr. FSU Jena, Math.-Naturw. Reihe* 29 (1980), 195–201

73. On $L_p(l_q)$ -spaces of entire analytic functions of exponential type: Complex interpolation and Fourier multipliers. The case $0 < p < \infty$. *J. Approximation Theory* 28 (1980), 317–328
74. On the spaces $F_{p,q}^s$ of Hardy–Sobolev type: Equivalent quasi-norms, multipliers, spaces on domains, regular elliptic boundary problems. *Comm. Partial Differential Equations* 5 (1980), 245–291
75. Maximal inequalities, Fourier multipliers, Littlewood–Paley theorems and approximation by entire analytic functions in weighted spaces. *Anal. Math.* 6 (1980), 87–103
76. A remark on complex interpolation theorems by Calderón–Torchinsky and Päivärinta. In "Notes on Functional Analysis", Rep. Dep. Math. Univ. Helsinki, 1980, 18–21
77. (mit B. Carl) Inequalities between eigenvalues, entropy numbers, and related quantities of compact operators in Banach spaces. *Math. Ann.* 251 (1980), 129–133
78. Complex interpolation and Fourier multipliers for the spaces $B_{p,q}^s$ and $F_{p,q}^s$ of Besov–Hardy–Sobolev type: the case $0 < p \leq \infty, 0 < q \leq \infty$. *Math. Z.* 176 (1981), 495–510
79. Spline bases and spline representations in function spaces. *Arch. Math. (Basel)* 36 (1981), 348–359
80. (mit D. E. Edmunds) Entropy numbers for non-compact self-adjoint operators in Hilbert spaces. *Math. Nachr.* 100 (1981), 213–219
81. Remarks on the Cauchy problem for the Maxwell equations in a curved space-time. In "E. B. Christoffel", Birkhäuser Verl., Basel 1981, 561–566
82. Mapping properties of abstract integral operators. Applications. *Beiträge Anal.* 17 (1981), 7–18
83. A remark on integral operators from the standpoint of Fourier analysis. In "Approximation and Function Spaces" (Gdańsk 1979), North-Holland, Amsterdam 1981, 821–829
84. Maximal inequalities: A useful tool in Fourier analysis. In "Seminar Analysis", Institut Math. Akad. Wissenschaften, Berlin 1982, 78–91
85. Characterizations of Besov–Hardy–Sobolev spaces via harmonic functions, temperatures, and related means. *J. Approximation Theory* 35 (1982), 275–297
86. Anisotropic function spaces and boundary value problems for semi-elliptic differential equations. In "Seminar Analysis 82/83", Institut Math. Akad. Wissenschaften, Berlin 1983, 19–43
87. A priori estimates and boundary value problems for semi-elliptic differential equations: a model case. *Comm. Partial Differential Equations* 8 (1983), 1621–1664
88. Modulation spaces on the euclidean n -space. *Z. Anal. Anwendungen* 2 (1983), 443–457
89. Periodic spaces of Besov–Hardy–Sobolev type and related maximal inequalities for trigonometrical polynomials. In "Functions, Series, Operators", II. Colloq. Math. Soc. János Bolyai 35. North-Holland, Amsterdam–New York, 1984, 1201–1209

90. Anisotropic function spaces. I: Hardy's inequalities, decompositions. *Anal. Math.* 10 (1984), 53–77
91. Anisotropic function spaces. II: Traces. *Anal. Math.* 10 (1984), 79–96
92. Mapping properties of non-linear operators generated by $\phi(u) = |u|^\rho$ and by holomorphic $\phi(u)$ in function spaces of Besov–Hardy–Sobolev type. Boundary value problems for elliptic differential equations of type $\Delta u = f(x) + \phi(u)$. *Math. Nachr.* 117 (1984), 193–213
93. Weighted anisotropic Sobolev spaces on domains: extensions and traces. *Math. Nachr.* 119 (1984), 309–319
94. (mit M. Geisler) Characterizations of Besov spaces via variable differences. *Comment. Math. Univ. Carolinae* 25 (1984), 415–430
95. (mit D. Edmunds) Remarks on certain non-linear elliptic equations in unbounded domains. *J. London Math. Soc.* 31 (1985), 331–339
96. A remark on a paper by D. E. Edmunds, A. Kufner and J. Rákosnik "Embeddings of Sobolev spaces with weights of power type". *Z. Anal. Anwendungen* 4 (1985), 35–38
97. Traces of anisotropic function spaces. Applications. In "Proc. Centre Math. Analysis Australian Nat. Univ. 9", 1985, 120–131
98. Recent developments in the theory of function spaces. In "Equadiff 6", *Lect. Notes Math.* 1192, Springer, Berlin, 1986, 95–106
99. Spaces of Besov–Hardy–Sobolev type on complete Riemannian manifolds. *Ark. Mat.* 24 (1986), 299–337
100. Die Entwicklung der Mathematik im Spiegel der Teubner–Bücher aus Leipzig. *Mitteilungen Math. Gesellschaft DDR*, Heft 1, 1986, 14–21
101. Jenaer Beiträge zur Theorie der Funktionenräume. *Wiss. Zeitschr. Univ. Jena, Naturw. Reihe* 36 (1987), 1, 101–103
102. Characterizations of function spaces on a complete Riemannian manifold with bounded geometry. *Math. Nachr.* 130 (1987), 321–346
103. (mit D. E. Edmunds and R. M. Edmunds) Entropy numbers of embeddings of fractional Besov-Sobolev spaces in Orlicz spaces: *J. London Math. Soc.* 35 (1987), 121–134
104. Anisotropic function spaces on the plane: Hardy's inequality and traces. In "Approximation Theory of Functions", *Proc. Intern. Conf. Kiev 1983. Moscow, "Nauka"*, 1987, 536–541
105. Pseudo-differential operators in F_{pq}^s -spaces. *Z. Analysis Anwendungen* 6 (1987), 143–150
106. Function spaces on Lie groups, the Riemannian approach. *J. London Math. Soc.* 35 (1987), 327–338
107. Einige neuere Entwicklungen in der Theorie der Funktionenräume. *Jber. Deutsch. Math.-Verein.* 89 (1987), 149–178

108. Characterizations of Besov–Hardy–Sobolev spaces: a unified approach. *J. Approximation Theory* 52 (1988), 162–203
109. Diffeomorphism properties and pointwise multipliers for function spaces. In "Function Spaces", Proc. Intern. Conf., Poznań 1986, Teubner–Texte Math. 103, Teubner, Leipzig, 1988, 75–84
110. Function spaces on Lie groups and on analytic manifolds. In "Function Spaces and Applications", Proc. US–Swedish Seminar, Lund 1986. Lect. Notes Math. 1302, Springer, Berlin, 1988, 384–396
111. Atomic representations of F_{pq}^s spaces and Fourier integral operators. In "Seminar Analysis of the Karl–Weierstraß–Institute 1986/87", Teubner–Texte Math. 106, Teubner, Leipzig, 1988, 297–305
112. On a class of weighted function spaces and related pseudodifferential operators. *Studia Math.* 90 (1988), 37–68
113. How to measure smoothness of distributions on Riemannian symmetric manifolds and Lie groups? *Z. Analysis Anwendungen* 7 (1988), 471–480
114. (mit D. E. Edmunds) Entropy numbers and approximation numbers in function spaces. *Proc. London Math. Soc.* 58 (1989), 137–152
115. Local approximation spaces. *Z. Analysis Anwendungen* 8 (1989), 261–288
116. Local means, oscillations, atoms and exotic pseudodifferential operators in function spaces. In "Function Spaces, Differential Operators and Nonlinear Analysis", Proc. Summer School Sodankylä, Finland 1988. Longman, Harlow (England), 1989, 155–167
117. A diagonal embedding theorem for function spaces with dominating mixed smoothness properties. In "Approximation and Function spaces", Banach Center Publ. 22, Warsaw 1989, 475–486
118. Atomic decompositions of F_{pq}^s spaces. Applications to exotic pseudodifferential and Fourier integral operators. *Math. Nachr.* 144 (1989), 189–222
119. Characterizations of F_{pq}^s spaces via local means, the extension problem. (Russian). *Trudy Mat. Inst. Steklov* 192 (1990), 207–220. [English translation: AMS, Proc. Steklov Inst. Math. 1992, vol. 3, 219–233]
120. Inequalities in the theory of function spaces: A tribute to Hardy, Littlewood and Polya. In "Inequalities", Proc. Conf. Birmingham (U.K.). Lecture Notes Pure Appl. Math. 119. New York: Marcel Dekker 1991, 231–248
121. (mit M. Malarski) Anisotropic function spaces: Hardy's inequality and traces on surfaces. *Czechoslovak Math. J.* 41 (1991), 518–537
122. (mit D. E. Edmunds) Entropy numbers and approximation numbers in function spaces, II. *Proc. London Math. Soc.* 64 (1992), 153–169

123. Approximation numbers and entropy numbers of embeddings of fractional Besov–Sobolev spaces in Orlicz spaces. *Proc. London Math. Soc.* 66 (1993), 589–618
124. A localization property for B_{pq}^s and F_{pq}^s spaces. *Studia Math.* 109 (1994), 183–195
125. (mit D. Haroske) Entropy numbers in weighted function spaces and eigenvalue distributions of some degenerate pseudodifferential operators I. *Math. Nachr.* 167 (1994), 131–156
126. (mit D. Haroske) Entropy numbers in weighted function spaces and eigenvalue distributions of some degenerate pseudo–differential operators. II. *Math. Nachr.* 168 (1994), 109–137
127. (mit D. E. Edmunds) Eigenvalue distributions of some degenerate elliptic operators: an approach via entropy numbers. *Math. Ann.* 299 (1994), 311–340
128. (mit H.-G. Leopold) Spectral invariance for pseudodifferential operators on weighted function spaces. *manuscripta math.* 83 (1994), 315–325
129. Relations between approximation numbers and entropy numbers. *J. Approximation Theory* 78 (1994), 112–116
130. (mit W. Sickel) Hölder inequalities and sharp embeddings in function spaces of B_{pq}^s and F_{pq}^s type. *Z. Analysis Anwendungen* 14 (1995), 105 - 140
131. (mit H. Winkelvoß) The dimension of a closed subset of R^n and related function spaces. *Acta Math. Hungar.* 68 (1 - 2) (1995), 117 - 133
132. (mit D. E. Edmunds) Logarithmic Sobolev spaces and their applications to spectral theory. *Proc. London Math. Soc.* 71 (1995), 333 - 371
133. *Mathematische Modellbildung. Berlin - Brandenb. Aka. Wiss., Berichte und Abhandlungen, Bd. 1* (1995), 13 - 19
134. (mit H. Winkelvoß) Intrinsic atomic characterizations of function spaces on domains. *Math. Z.* 221 (1996), 647 - 673
135. (mit H. Winkelvoß) A Fourier analytical characterization of the Hausdorff dimension of a closed set and of related Lebesgue spaces. *Studia Math.* 121 (1996), 149 - 166
136. (mit D. E. Edmunds) Spectral theory for isotropic fractal drums. *C. R. Acad. Sci. Paris* 326, Ser. I, (1998), 1269 - 1274
137. Gaussian decompositions in function spaces. *Result. Math.* 34 (1998), 174 - 184
138. (mit D. E. Edmunds) Logarithmic spaces and related trace problems. *Functiones et Approximatio* 26 (1998), 189 - 204
139. Decompositions of function spaces. In: *Topics in Nonlinear Analysis. Progress in Nonlinear Diff. Equations Applications* 35 , Birkhäuser, Basel 1999, 691 - 730
140. Function spaces and spectra of elliptic operators on a class of hyperbolic manifolds. *Studia Math.* 134 (1999), 179 - 202

141. Hardy inequalities in function spaces. *Math. Bohem.* 124 (1999), 123 - 130
142. Quarks, fractals, non-linearities, and related elliptic operators. *Proceedings Conf. 'Non-linear analysis, function spaces and applications VI'*, Prague, 1998. *Math. Inst. Czech Acad. Sci., Prague*, 1999, 200 - 222
143. (mit D. E. Edmunds) Sharp Sobolev embeddings and related Hardy inequalities: The critical case. *Math. Nachr.* 207 (1999), 79 - 92
144. (mit D. E. Edmunds) Eigenfrequencies of isotropic fractal drums. *Operator Theory: Advances Appl.* 110 (1999), 81 - 102
145. Sharp Sobolev embeddings and related Hardy inequalities: The sub-critical case. *Math. Nachr.* 208 (1999), 167 - 178
146. (mit W. Farkas) The distribution of eigenfrequencies of anisotropic fractal drums. *J. London Math. Soc. (2)* 60 (1999), 224 - 236
147. The Laplace operator in fractal domains. *Proceedings Conf. 'Function spaces, differential operators and nonlinear analysis'*, Syöte (Finland), 1999. *Math. Inst. Czech Acad. Sci., Praha*, 2000, 251 - 260
148. Taylor expansions of distributions. *Numer. Funct. Anal. and Optimiz.* 21 (2000), 307 - 317
149. Truncations of functions. *Forum Math.* 12 (2000), 731 - 756
150. Regularity theory for some semi-linear equations: the Q -method. *Forum Math.* 13 (2001), 1 - 19
151. Refined solutions of some integral equations. *Functiones et Approximatio* 29 (2001), 143 - 158
152. (mit Dachun Yang) Spectral theory of Riesz potentials on quasi-metric spaces. *Math. Nachr.* 238 (2002), 160 - 184
153. Towards a Gausslet analysis: Gaussian representations of functions. *Proceedings Conf. 'Function spaces, interpolation theory and related topics'*, Lund, 2000. *W. de Gruyter, Berlin*, 2002, 425 - 449
154. Sharp embeddings in function spaces. *'Functions, Series, Operators'*, Alexits Memorial Conf., Budapest, 1999. *J. Bolyai Math. Soc., Budapest*, 2002, 39-73
155. Fraktale Analysis aus der Sicht der Funktionenräume. *Jahresbericht DMV* 104 (2002), 171-199
156. Function spaces in Lipschitz domains and on Lipschitz manifolds. Characteristic functions as pointwise multipliers. *Revista Mat. Complutense* 15 (2002), 475 - 524
157. Wavelet frames for distributions; local and pointwise regularity. *Studia Math.* 154 (2003), 59-88

158. Fractal characteristics of measures; an approach via function spaces. *Journ. Fourier Anal. Applications* 9 (2003), 411-430
159. Characterisation of function spaces via mollification; fractal quantities for distributions. *Journ. Function Spaces Applications* 1 (2003), 75-89
160. The positivity property of function spaces. In: Proc. Sixth Conf. *Function Spaces*, Sept. 2001, Wrocław. World Scientific Publ., Singapore 2003, 263-274
161. Non-smooth atoms and pointwise multipliers in function spaces. *Ann. Mat. Pura Appl.* 182 (2003), 457-486
162. The distribution of eigenvalues of some fractal elliptic operators and Weyl measures. *Operator Theory: Advances and Applications* 147 (2004), 457-473
163. Approximation numbers in function spaces and the distribution of eigenvalues of some fractal elliptic operators. *Journ. Approx. Theory* 129 (2004), 1-27
164. The fractal Laplacian and multifractal quantities. In: *Progress in Probability* 57, Birkhäuser, Basel 2004, 173-192
165. Lacunary measures and self-similar probability measures in function spaces. *Acta Math. Sinica, Engl. Series*, 20 (2004), 577-588
166. (mit Fernando Cobos und Luz M. Fernández-Cabrera) Abstract and concrete logarithmic interpolation spaces. *J. London Math. Soc.* 70 (2004), 231-243
167. A note on wavelet bases in function spaces. *Orlicz Centenary Vol.*, Banach Center Publ. 64 (2004), 193-206
168. (mit Dorothee Haroske) Wavelet bases and entropy numbers in weighted function spaces. *Math. Nachr.* 278 (2005), 108-132
169. The regularity of measures and related properties of eigenfunctions and first eigenvalues of some fractal elliptic operators. *Ann. Soc. Math. Polonae. Ser I: Commentationes Mathematicae, tomus spec. in honorem I. Musielak*, (2004), 257-283
170. A new approach to function spaces on quasi-metric spaces. *Rev. Mat. Complut.* 18 (2005), 7-48
171. Wavelet bases in anisotropic function spaces. Proc. 'Function Spaces, Differential Operators, and Nonlinear Analysis', Milovy (Czech Rep.), 2004. *Math. Inst. Acad. Sci. Czech Republic, Praha*, 2005, 370-387
172. Sampling numbers and embedding constants. *Trudy Mat. Inst. Steklov* 248 (2005), 275-284. *Proc. Steklov Inst. Math.* 248 (2005), 268-277
173. Spaces on sets. *Uspechi mat. nauk* 60:6 (2005), 187-206 (Russian). *Russian Math. Surveys* 60 (2005), 1195-1215
174. (mit E. Novak) Function spaces in Lipschitz domains and optimal rates of convergence for sampling. *Constr. Approx.* 23 (2006), 325-350

175. (mit A.M. Caetano und S. Lopes) A homogeneity property for Besov spaces. *Journ. Function Spaces Appl.* 5 (2007), 123-132
176. Wavelets in function spaces on Lipschitz domains. *Math. Nachr.* 280 (2007), 1205-1218
177. Wavelet para-bases and sampling numbers in function spaces on domains. *Journ. Complexity* 23 (2007), 468-497
178. Local means and wavelets in function spaces. *Proc. Conf. Function Spaces 8*, Bedlewo, 2006. *Banach Center Publ.* 79 (2008), 215-234
179. The dichotomy between traces on d -sets Γ in \mathbb{R}^n and the density of $D(\mathbb{R}^n \setminus \Gamma)$ in function spaces. *Acta Math. Sinica* 24 (2008), 539-554
